

Prof. Baoxin Qi

Baoxin Qi is an associate professor at School of Civil Engineering, University of Shenyang Jianzhu. He is a Level 2 registered construction engineer in China. He is the Vice Dean of the School of Civil Engineering. He is the United States member of the Mechanics and Control Committee of the Institution of Civil Engineers, member of the United States Society of Civil Engineers, member of the Youth Committee of Structural Vibration Control and Health Monitoring, member of the China Branch of the International Society for Structural Control and Monitoring, member of the International Society of Civil Engineering for the Whole Life Cycle, and member of the Chinese Society of Mechanics. His interests are in the field of the impact resistance performance of building structures and structural health monitoring. He has published more than 30 papers in refereed journals, conference proceedings and 3 books including one co-authored book. He has performed more than 15 projects, in which the funded research on the damage mechanism and health monitoring of polyvinyl alcohol fiber reinforced cement-based composite columns under impact loads by Liaoning Provincial Natural Science Foundation. In the field of civil engineering, He has received several awards, including 2018 the Second Prize for Natural Science Academic Achievements in Shenyang.
