

Prof. Guochang Li

Prof. Guochang Li serves as Dean of the Faculty of Civil Engineering at Shenyang Jianzhu University. Additionally, she holds the role of Director of the University's Academic Committee, and is a Visiting Professor at the Georgia Institute of Technology and the University of Nebraska Lincoln. She is mainly engaged in the research of steel-concrete composite structures and steel structures. She has invented three high-performance CFST structures, and established design theories and methods. Additionally, she has also developed a new-typed prefabricated steel structure with the design theories and methods built. She has developed the new-typed external wall, beam-column connection joints, and external wall and structure connection technology, and she has developed a new-typed buckling restrained brace and its applications to aforementioned structural system as well.
