

Prof. Haixia Zhang

Dr. Haixia Zhang is a professor at School of Civil Engineering, University of Shenyang Jianzhu. She is a registered professional engineering in China. She is the dean of Performance Appraisal department. Her interests are in the field of mechanical performance of new FRP-concrete composite structure and RC structure sustainability and renewal.

She has published more than 60 papers in refereed journals, conference proceedings and 4 books including one co-authored book. She has performed more than 20 projects, in which the funded research on impact behavior of new FRP tube-encased I steel concrete column and RC beams strengthened by near-surface mounted with FRP bars sponsored by National Natural Science Foundation of China. In the field of civil engineering, she has received several awards, including 2020 Science and Technology Special Award from China Steel Structure Association.
